Professional Summary

Frontend Engineer skilled in **React, TypeScript, Tailwind CSS, and modern frontend tooling**. Experienced in translating design specs into polished, responsive user interfaces and collaborating across teams to build maintainable, performant web applications. Currently pursuing a **Diploma in Frontend Engineering at AltSchool Africa (Ayoba-funded scholarship)**, where I've built and deployed production-ready projects using React, TanStack Query, and localStorage. Passionate about clean architecture, accessibility, and continuous learning through real-world projects and open collaboration.

Technical Skills

Languages & Frameworks:

HTML, CSS, JavaScript (ES6+), React, TypeScript, Tailwind CSS

Tools & Technologies:

Vite, Git, GitHub, Figma, REST APIs

Core Competencies:

UI implementation, component-based architecture, performance optimization, responsive design, accessibility, testing, code documentation, collaboration.

Key Projects

Studex (Team Collaboration Project)

Role: Frontend Developer — 2025

Collaborated with a team of product managers, frontend engineers, backend engineers, cloud engineers, cybersecurity personnel to design and build a Student Marketplace Platform using React 18+, React Router v6, Tailwind CSS, Tanstack Query and Vite.

Implemented reusable UI components, state management logic, and responsive layouts.

Participated in peer code reviews, Git-based collaboration, and continuous integration.

Reflected in GitHub contribution graph and commits on the Studex repository

Todo Application

Solo Project — 2025

Built a CRUD-based Todo app using React 19+, TanStack Query, Tailwind CSS, and localStorage persistence.

Focused on performance, keyboard accessibility, color contrast, and modular code structure.

Deployed using Vercel with a mock API hosted on Render.

Continuously developed by implementing Authentication and converting from ReactJs to ReactTs.

100 Days of Code Challenge

2025

Publicly documented daily coding progress and learning milestones on LinkedIn and X.

Projects cover UI design systems, state management, and interactive app development.

Education

AltSchool Africa — Diploma in Frontend Engineering (In Progress)

100% Scholarship funded by Ayoba

3MTT (3 Million Technical Talent Program) — UI/UX Design Certificate (Completed)

University of Ibadan — B.Sc. Forest Resources Management (2018)

Second Class Upper Division

Professional Experience

Lecturer & Researcher

Federal College of Forestry — 2023–Present

Teach and mentor students, integrating modern digital tools into academic workflows.

Apply analytical and structured problem-solving methods relevant to software development.

Lead research projects requiring data-driven analysis, collaboration, and clear documentation.

Assistant Project Manager / Voiceover Artist / Scriptwriter

Lolu Studios — Feb 2023 – Apr 2023

Managed deliverables and timelines for creative projects involving multimedia content.

Developed storytelling and communication skills useful for UX writing and user flow design.

Project Manager / Customer Service Personnel

Melody Events & Entertainment Ltd — Jun 2020 – Jan 2023

Coordinated client requirements and end-to-end project execution.

Strengthened collaboration and stakeholder communication skills.

CERTIFICATIONS & TRAINING

Frontend Engineering Program — AltSchool Africa

UI/UX Design Certificate — 3MTT

UI/UX Design Fundamentals — Self-taught (Online)

Community & Interests

Active in Women in Tech communities and mentorship initiatives

Write and share technical content on frontend concepts and tools

Passionate about design thinking, collaboration, and developer advocacy
